

1. Matter as Light-Dynamos  
(Matter = ultra high-energy light,  
dielectric dynamos stirring the Aether)

2. Aether as the Medium  
(Stress & torsion = dielectric & magnetic effects)

3. Induction into the Aether  
(Matter creates impulse currents  
that seek balance/homeostasis)

4. Impulse Toward Counterspace  
(Light & matter cycle back to counterspace;  
this impulse is observed as gravity)

5. Gravity as Inertia-Homeostasis  
(Not mass pulling mass, but Aether  
moving matter toward torsion-erasure)

6. Unity with Other Phenomena

- Magnetic 'attraction'
- Electrostatic cling
- Lightning discharge

7. Final Outcome  
(Nature abhors Aether imbalance;  
gravity leads to zero torsion,  
perfect inertia balance)
